Noise pollutes our environment just as much as smoke, foul water, dirty air and litter. It can cause illness and deafness. The human body never gets used to noise. It continues to react even though a person thinks he or she has become accustomed to all the surrounding noises. For instance, Naseer, who lived in an apartment on a busy street, often boasted that he could sleep through any kind of noise. He claimed he just didn't hear it. Well, Naseer could sleep through the roar of traffic and the blare of a television set in the next apartment, but he did not know that while he slept, his body was reacting to the stress of the noise.

A doctor in West Germany, after researching the effects of noise, concluded that sounds heard by persons when they are asleep can cause danger to their hearts and blood vessels. May be this was the reason why Naseer had so many headaches. Noise causes the blood vessels in the brain to expand. It brings no pain.

The field was white, as if covered with salt. Lencho's soul was filled with sadness. He stood in the middle of the field helpless. He thought that his family would go hungry throughout the year. He couldn't expect any help from anybody except that of God.

ଓର, According to Sunil Manohar Gavaskar, the four leading all-rounders in the world cricket were Imran Khan of Pakistan, Ian Botham of England, Kapil Dev of India and Richard Hadlee of New Zealand.

They have played under pressure and have performed excellently. They have got ability to face any opponent at any time. So a captain loves to have all these all-rounders in his team to win a match.

The three approaches to control air pollution are preventive measures, dispersal measures and collection measures. Preventive measures can be taken by changing the raw materials used in industries or the ingredients of fuel. Dispersal measures can be taken by raising the heights of smokestacks. Lastly collection measures can be taken by designing equipment to trap the pollutants before they escape into the atmosphere.

Or, According to Lord Eustace Percy, the pupils are supposed to choose a profession after school.
